Preface / xv

Invited Presentations and Tutorials

Invited Presentations / 2

Chitta Baral, Ian Horrocks, Yoav Shoham

Reasoning about Actions and Change: From Single Agent

Actions to Multiagent Actions (Extended Abstract) / 3

Chitta Baral

Tutorial Presentations / 6

Leonardo de Moura, Carsten Lutz, monica mc schraefel, Bernhard Nebel

Abduction and Diagnosis

Complexity of Propositional Abduction for

Restricted Sets of Boolean Functions / 8

Nadia Creignou, Johannes Schmidt, Michael Thomas

New Advances in Sequential Diagnosis / 17

Sajjad Siddiqi, Jinbo Huang

Diagnosis as Planning Revisited / 26

Shirin Sohrabi, Jorge A. Baier, Sheila A. McIlraith

Agents, Multiagent Systems, and Distributed Reasoning

Interactions between Time and Knowledge in a

First-Order Logic for Multi-Agent Systems / 38

Francesco Belardinelli, Alessio Lomuscio

Multi-Agent Only-Knowing Revisited / 49

Vaishak Belle, Gerhard Lakemeyer

Distributed Nonmonotonic Multi-Context Systems / 60

Minh Dao-Tran, Thomas Eiter, Michael Fink, Thomas Krennwallner

Modelling Combinatorial Auctions in Linear Logic / 71

Daniele Porello, Ulle Endriss

Integrating Action Calculi and AgentSpeak: Closing the Gap / 79

Michael Thielscher

One Hundred Prisoners and a Lightbulb — Logic and Computation / 90
Hans van Ditmarsch, Jan van Eijck, William Wu

Argumentation

Abstract Dialectical Frameworks / 102
Gerhard Brewka, Stefan Woltran

Towards Fixed-Parameter Tractable Algorithms for Argumentation / 112
Wolfgang Dvorak, Reinhard Pichler, Stefan Woltran

Characterizing Strong Equivalence for Argumentation Frameworks / 123
Emilia Oikarinen, Stefan Woltran

Belief Change, Counterfactuals, and Update

Characterizing Updates in Dynamic Epistemic Logic / 135
Guillaume Aucher

Horn Clause Contraction Functions:
Belief Set and Belief Base Approaches / 143
James P. Delgrande, Renata Wassermann

From Causal Models to Counterfactual Structures / 153
Joseph Y. Halpern

Taxonomy of Improvement Operators and the Problem of Minimal Change / 161
Sébastien Konieczny, Mattia Medina Grespan, Ramón Pino Pérez

Decision Theory

A Characterization of Optimality Criteria for
Decision Making under Complete Ignorance / 172
Ramzi Ben Larbi, Sébastien Konieczny, Pierre Marquis

I Don't Want to Think about It Now:
Decision Theory with Costly Computation / 182
Joseph Y. Halpern, Rafael Pass

Description Logics and Ontologies

Query and Predicate Emptiness in Description Logics / 192
Franz Baader, Meghyn Bienvenu, Carsten Lutz, Frank Wolter

Decidability of a Description Logic over Infinite-Valued Product Logic / 203
Marco Cerami, Francesc Esteve, Félix Bou

Pushing the Limits of Reasoning over Ontologies with Hidden Content / 214
Bernardo Cuenca Grau, Boris Motik

Status *QIO*: Conjunctive Query Entailment Is Decidable / 225
Birte Glimm, Sebastian Rudolph

Decomposing Description Logic Ontologies / 236

Boris Konev, Carsten Lutz, Denis Ponomaryov, Frank Wolter

The Combined Approach to Query Answering in *DL-Lite* / 247

Roman Kontchakov, Carsten Lutz, David Toman, Frank Wolter, Michael Zakharyashev

Understanding Ontological Levels / 258

Claudio Masolo

Worst-Case Optimal Reasoning for the Horn-DL Fragments of OWL 1 and 2 / 269

Magdalena Ortiz, Sebastian Rudolph, Mantas Simkus

On the Complexity of Axiom Pinpointing in the *EL* Family of Description Logics / 280

Rafael Peñaloza, Baris Sertkaya

Improving Query Answering over *DL-Lite* Ontologies / 290

Riccardo Rosati, Alessandro Almatelli

Inconsistency Handling

On the Application of the Disjunctive Syllogism in

Paraconsistent Logics Based on Four States of Information / 302

Ofer Arieli

Maximally Paraconsistent Three-Valued Logics / 310

Ofer Arieli, Arnon Avron, Anna Zamansky

A Class of *df*-Consistencies for Qualitative Constraint Networks / 319

Jean-François Condotta, Christophe Lecoutre

Finding Explanations of Inconsistency in Multi-Context Systems / 329

Thomas Eiter, Michael Fink, Peter Schüller, Antonius Weinzierl

Computing Inconsistency Measurements under

Multi-Valued Semantics by Partial Max-SAT Solvers / 340

Guohui Xiao, Zuoquan Lin, Yue Ma, Guilin Qi

Planning

Generalized Planning with Loops under Strong Fairness Constraints / 351

Giuseppe De Giacomo, Fabio Patrizi, Sebastian Sardina

A Correctness Result for Reasoning about One-Dimensional Planning Problems / 362

Yuxiao Hu, Hector J. Levesque

Possibility Theory and Uncertainty

On the Classical Content of Monadic $G^{\sim}$ and Its Application to a Fuzzy

Medical Expert System / 373

Agata Ciabattoni, Pavel Rusnok

Novel Semantical Approaches to Relational Probabilistic Conditionals / 382

Gabriele Kern-Isberner, Matthias Thimm

Probabilistic Description Logics for Subjective Uncertainty / 393

Carsten Lutz, Lutz Schröder

Preferential Semantics for Plausible Subsumption in Possibility Theory / 404
Guilin Qi, ZhiZheng Zhang

Preferences

From Preference Logics to Preference Languages, and Back / 414
Meghyn Bienvenu, Jérôme Lang, Nic Wilson

Finding the Next Solution in Constraint- and Preference-Based
Knowledge Representation Formalisms / 425
Ronen Brafman, Francesca Rossi, Domenico Salvagnin, Kristen Brent Venable, Toby Walsh

Reasoning about Action and Action Programs

State Defaults and Ramifications in the Unifying Action Calculus / 435
Ringo Baumann, Gerhard Brewka, Hannes Strass, Michael Thielscher, Vadim Zaslavski

Situation Calculus-Based Programs for Representing and Reasoning
about Game Structures / 445
Giuseppe De Giacomo, Yves Lespérance, Adrian R. Pearce

Reasoning about Deterministic Actions with Probabilistic Prior and
Application to Stochastic Filtering / 456
Hannaneh Hajishirzi, Eyal Amir

Rule-Based Reasoning, Logic Programming, and Answer Set Programming

Walking the Decidability Line for Rules with Existential Variables / 466
Jean-François Baget, Michel Leclère, Marie-Laure Mugnier

A Decidable Class of Groundable Formulas in the General Theory of Stable Models / 477
Michael Bartholomew, Joohyung Lee

Paracoherent Answer Set Programming / 486
Thomas Eiter, Michael Fink, João Moura

Repair and Prediction (Under Inconsistency) in Large Biological Networks
with Answer Set Programming / 497
*Martin Gebser, Carito Guziolowski, Mihail Ivanchev, Torsten Schaub, Anne Siegel,
Sven Thiele, Philippe Veber*

Tractable Answer-Set Programming with Weight Constraints:
Bounded Treewidth Is Not Enough / 508
Reinhard Pichler, Stefan Rümmele, Stefan Szeider, Stefan Woltran

On the Progression Semantics and Boundedness of Answer Set Programs / 518

Preface

KNOWLEDGE REPRESENTATION AND REASONING (KR&R) has long been a vibrant and exciting field of human endeavor, and has become a key driver of innovation in computer science. It has also led to significant advances in practical applications from artificial intelligence to software engineering. In a nutshell, research in KR&R is aimed at an understanding of how to store, retrieve, and interact with knowledge, and at the development of methods and tools for the practical performance of these tasks. The KR&R landscape is broad and diverse. Dedicated formalisms have been developed for different kinds of knowledge, such as, for representing and reasoning about temporal, spatial, or vague knowledge; and different forms of human reasoning motivated research on specific reasoning tasks such as planning, argumentation, and belief revision. The KR conference series serves as a biannual gathering for researchers working on these different aspects of KR&R, and fosters communication, cross-fertilization of ideas, and collaboration across their boundaries. As a consequence, KR conferences' lists of topics of interest are diverse and cover a broad range of substantial research areas. KR 2010 is no different. Its list of topics include "natural language processing, summarization, categorization," "causal reasoning, abduction, model-based diagnosis," as well as "computational aspects of knowledge representation." Another consequence of KR's amalgamation effect can be seen in the growing number of collocated events. As on many previous occasions, in 2010, KR is collocated with the International Conference on Automated Planning and

Scheduling (ICAPS), the International Workshop on Description Logics (DL), and the International Workshop on Non-Monotonic Reasoning (NMR). Moreover, KR 2010 is collocated with the International Conference on Formal Ontology in Information Systems (FOIS) and, for the first time, with the International Conference on Autonomous Agents and Multiagent Systems (AAMAS), holding with the latter a joint technical session with both invited talks and presentations of regular papers from AAMAS and KR.

We received 211 submissions that emerged from 266 registered abstracts. This was not as many as in KR 2008 (where it was 251), but comparable with 210 submissions to KR 2006, and significantly more than 199 and 161 submissions to KR 2004 and KR 2002, respectively. It meant a considerable work load for the members of the program committee. Interestingly, in addition to the "traditional big" themes such as reasoning about actions, logic programming, or description logics, we were faced with a surprising number of submissions, in particular on argumentation and preferences, which caused us to further extend the program committee. We would like to express our gratitude to all members of the Program Committee for their hard work, thorough and timely reviews, and informed discussion — and thank especially those Program Committee members who were so kind as to accept our invitation after the submission deadline. From the 211 submissions, we accepted 53 papers as regular papers and 16 as short papers with poster presentation: the latter category was introduced to give a forum to authors who submitted an interesting,

promising new idea, in a form that was felt to be not mature enough for a regular KR paper.

The conference program includes four invited talks, by five invited speakers: Ron Brachman and Hector Levesque will present a “Great moments in KR” talk in the joint session with AAMAS. Ian Horrocks will share some of his experiences on how performance, language standards, and infrastructure are vital ingredients to make a well-established, logic-based KR&R formalism useable and attractive. Yoav Shoham will discuss logics that capture intuitions about intention and other mental constructs from a computational perspective, namely from a database perspective. Finally, Chitta Baral will describe a journey in reasoning about actions and change — from single agent actions to multiagent actions.

In addition, we follow the traditions established at KR 2006 to have tutorials and at KR 2004 to have a doctoral consortium. For the latter, Yan Zhang has brought together an exciting program. For the former, we were able to invite the following four tutorial presenters: Leonardo de Moura (presenting Satisfiability with and without Theories); Carsten Lutz (presenting Reasoning in DLs: Expressive Power Versus Computational Complexity); Bernhard Nebel (presenting Computational Complexity of Action Planning); and monica mc schraefel [sic] (presenting What if You Wanted Someone (Else) to Use This? Usability Heuristics for KR Tool and Representation Design).

Finally, we thank all those who helped making KR 2010 a success. Mikhail Soutchanski, our Local Arrangement Chair, has worked extremely hard and efficiently throughout the preparation of the conference: KR 2010 being colocated with five other conferences made their job even more tricky. Finally, we would like to cordially thank Yan Zhang (Doctoral Consortium Chair), Joost Vennekens (Publicity Chair), Joshua Gross, Alexandra Goultiaeva, Yilan Gu, and Wael Yehia (local organisation team) for their efforts and priceless service. Last but not least, we would like to thank our sponsors who have enabled us to invite speakers and tutorial presenters, to run a doctoral consortium, and to organize the conference: KR, Inc., *Artificial Intelligence Journal*, IBM, ECCAI, University of Kentucky, and Ryerson University.

Terms of Use

This Agreement sets forth the terms and conditions for licensing of the KR 2010 CD to you (“you” or “Licensee”), and use of this CD indicates that you have read and understand this Agreement and accept its terms and conditions. If you do not agree with this Agreement, do not use the KR 2010 CD. This CD is for your personal, noncommercial use. Content copied or printed must retain all copyright, trademark, and other proprietary notices. Except as expressly set forth in this Agreement, you may not modify, copy, distribute, disclose, retransmit, sell, publish, broadcast, or circulate this CD in whole or in part without AAAI’s prior written consent. For commercial use of any portion of the contents you must secure written consent from AAAI.

License and Restrictions

Subject to the terms and conditions of this Agreement, you are granted a limited non-exclusive license to use a copy of this publication on one (1) computer used by a single household. You may make one (1) backup copy of the CD for your own personal use. You may print out one copy of the KR 2010 CD in hard copy for your own personal use. You agree not to: (1) make additional copies of this CD except as provided above; (2) print out copies of the papers on this CD except as provided above; (3) give copies to another person who has not purchased a license for this CD from AAAI; (4) install the publication on computers used by individuals who have not purchased the appropriate licenses for the KR 2010 CD from AAAI; (5) duplicate the CD by any other means including electronic transmission. This CD in its entirety is protected by copyright laws.

Termination

This Agreement may be terminated by AAAI immediately and without notice if you fail to comply with any term or condition of this Agreement. Upon such termination, you must immediately destroy all complete and partial copies of the KR 2010 CD, including all backup copies. AAAI shall have the right to change or add to the terms of this Agreement at any time, and to change, discontinue or impose conditions on any aspect of the KR 2010 CD, and your continued use of the KR 2010 CD will indicate your agreement to any such change.

Disclaimer of Warranties

1. The KR 2010 CD is provided “as is.” AAAI and its affiliates, licensors, third-party content or service providers, distributors, dealers, or suppliers makes no express or implied warranties with respect to matters such as accuracy, completeness, timeliness, fitness for a particular purpose, non-infringement, and merchantability in regard to this CD. 2. AAAI assumes no contractual liability for trademark or other infringements on intellectual property rights with respect to infringing material provided by third parties to AAAI. 3. AAAI assumes no liability for errors or omissions of material that appears on this CD. 4. AAAI shall have no liability for damages arising from any reliance on data, information, or other content published on this CD. 5. Neither the mention of, citation to, or other reference to any individual, group, organization,

product, viewpoint, opinion, theory or any and all such entities and matters shall constitute an endorsement thereof or infer any association therewith in regard to AAAI. Conversely, the failure to so mention, cite, or otherwise reference shall not be construed, deemed or otherwise understood as implying or inferring anything whatsoever.

Limitation of Liability and Damages

THE ENTIRE LIABILITY OF AAAI FOR ANY REASON SHALL BE LIMITED TO THE AMOUNT PAID BY THE CUSTOMER FOR THE KR 2010 CD LICENSED FROM AAAI OR ITS AUTHORIZED RESELLER. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, AAAI AND ITS REPRESENTATIVES ARE NOT LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER BASED ON BREACH OF CONTRACT, BREACH OF WARRANTY, TORT (INCLUDING NEGLIGENCE), PRODUCT LIABILITY OR OTHERWISE, EVEN IF AAAI OR ITS REPRESENTATIVES HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, AND EVEN IF A REMEDY SET FORTH HEREIN IS FOUND TO HAVE FAILED OF ITS ESSENTIAL PURPOSE. AAAI AND ITS REPRESENTATIVES' TOTAL LIABILITY TO YOU FOR ACTUAL DAMAGES FOR ANY CAUSE WHATSOEVER WILL BE LIMITED TO THE AMOUNT PAID BY YOU FOR THE KR 2010 CD.

General Provisions

This Agreement sets forth AAAI's and its Representatives' entire liability and your exclusive remedy with respect to the KR 2010 CD. You acknowledge that this Agreement is a complete statement of the agreement between you and AAAI. This Agreement does not limit any rights that AAAI may have under copyright, patent, trademark or other laws. The Representatives of AAAI are not authorized to make modifications to this Agreement other than in writing signed by an officer of AAAI. If any provision of this Agreement is invalid or unenforceable under applicable law, then it is, to that extent, deemed omitted and the remaining provisions will continue in full force and effect. No delay or failure on the part of AAAI in the exercise of any right granted under this Agreement, or available at law or in equity, shall be construed as a waiver of such right. This Agreement shall be governed by California law, except as to copyright and trademark matters, which are covered by federal laws. You agree to submit to the jurisdiction of the federal and state courts of San Mateo County, California and waive any objection to venue in such courts. This Agreement is deemed entered into at Menlo Park, California.

Copyright

Copyright © 2010 Association for the Advancement of Artificial Intelligence. All rights reserved. This publication, or parts thereof, may not be reproduced in any form without permission.

CD Organization

This CD is organized into 3 directories numbered 01–03. Directory 01 contains the frontmatter. Directory 02 contains the papers. Directory 03 contains the index and index.pdx files. Within this directory, papers are numbered according to their appearance in the contents. The contents file is called contents.pdf. The index file is called index.pdf.

Using the CD

To use all the features of this publication, you must have installed version 9 or above of Adobe Acrobat® or Adobe Acrobat Reader®. This software is NOT included in this CD. To obtain it, you must visit Adobe's website (www.adobe.com). Some versions of Adobe Acrobat Reader are available without charge.

IF YOU ARE NOT USING ADOBE ACROBAT 9 OR LATER OR ADOBE ACROBAT READER 9 OR LATER, YOU MAY BE UNABLE TO USE THE FOLLOWING NAVIGATION FEATURES OF THIS CD.

Links

Destination links are provided from the contents file (contents.pdf) and the index file(index.pdf) of the proceedings included on this CD. To locate the contents page of the proceedings, select the hand tool (or another suitable navigation tool—check the Acrobat help files if you are unsure which tool to select) in Acrobat and position the cursor over the word “Contents” or the word “Index” on the main navigation page and slowly move it until the pointer changes to a hand with a pointing finger. Then click the link to move to the new document. On some systems, the cursor shape may be different. Consult the Acrobat help files if you are having trouble following a destination link.

The contents pages of the KR 2010 proceedings on this CD contain links to individual papers. For aesthetic purposes and to aid readability of the document, the links are hidden, but are easily located. To locate a particular paper, first navigate to the contents page of the proceedings, (the file name is contents.pdf) place your cursor (be sure you have selected the proper tool in Acrobat) over the title of the paper on the contents page and slowly move it until the pointer changes to a hand with a pointing finger. Then click the link to move to the new document. To return to the contents page, choose “Document—>Goto Previous Document” in the Acrobat toolbar (on some systems and versions of Acrobat, the location and name of this command may differ). You may also return to the contents page by selecting the bookmark called Contents that appears in all the files. In a similar way, you may select the bookmark called Index to return to the index file (index.pdf). Consult the Acrobat help files if you are having trouble returning to the previous document. In some versions of Acrobat, a keyboard shortcut is available to return you to the previous document.

To follow a destination link in the index, position your cursor over the page number associated with the document you want to read (be sure you have selected the proper tool in Acrobat). Position the pointer over the page number until the pointer changes to the hand with a pointing finger. Then click the link to move to the new document. To return to the index, choose “go to previous document” in the Acrobat toolbar.

Full Text Search

An index of this entire CD has been provided to enable full-text searches of all documents. To search the

papers on this CD using the Adobe Acrobat Search command, you must first select the index to search. To add the index on this CD, follow the Acrobat Help instructions on adding indexes to search, and select the KR.pdx file provided on this CD in directory 03.
